

**MODULAR CARPET**

Modular carpet tiles are easy to install and more cost effective than broadloom. You can replace a complete floor of modular carpet without tearing down and moving the furniture.

Also, you won't have to completely replace or patch worn carpet. You can extend the life of your carpet by moving tiles from low traffic areas to replace carpet that has had heavy wear in high traffic areas.

The life cycle cost of carpet tile exceeds broadloom. The life span of carpet tile is generally 1-2 years longer than broadloom. Installation of carpet tile is relatively quick and minimally disrupts employees. Replacement costs are significantly lowered when considering tear-up, disposal of old carpet, and lost productivity of employees.

Carpet tile also allows easy access to under-floor utilities and can be used to create wayfinding in a large facility.

SERVICE

Milliken Carpet Tile

FEATURES

Modular

Cushioned Backing

Wide Range of Patterns and Colors

Invisible Seams™

Precision Millitron Injection Dyeing Method

BENEFITS

Design and Aesthetic Flexibility

Quick Installation

Financial Benefits

Minimal disruption to staff
